softline®

Softline Group: 30 Years in the IT Industry

1993
- Company founded. Initial focus: scientific software licensing
- Team of 10 employees

2007
- The company becomes the market leader in software licensing in Russia and the CIS
- The decision was made to begin international expansion

2018
- Presence established in more than 30 countries worldwide
- Softline Group received the Microsoft Country Partner of the Year award for the second consecutive year

2021
- Continued the strategic transition toward becoming a leading provider of digital transformation and information security services with strong positions in emerging markets
- IPO on the London Stock Exchange (LSE) and Moscow Exchange (MOEX) – SFTL
- Market cap: $1.5 billion

2022
- Corporate restructuring: separation into Softline Group and Noventiq

2023

IPO

September 26, 2023
IPO on MOEX and the St. Petersburg Stock Exchange – under the ticker SOFL

Capitalization: exceeded 50 billion rubles

- Issue 002P-01
- IPO
- SPO

2025
- Softline Group evolved from a digital transformation and information security solutions provider into an investment and technology holding focused on innovation.

Digital Transformation. Successful. Effective.

softline

Our Mission and Goal

Softline Group is committed to strengthening and supporting the technological sovereignty of the countries in which it operates. We leverage cutting-edge developments in information technology, artificial intelligence, cloud computing, robotics, and laser technology to help build resilient and forward-looking digital ecosystems.

softline®

Company Values

Leadership	→ The Softline Group is among the fastest-growing players in the IT industry
Client-Centric Approach	→ We deliver large-scale, technologically complex projects for over 100,000 corporate clients
Unified Team and Partnership Culture	→ We build long-term partnerships founded on trust, openness, and collaboration
Technological Innovation	→ Over three decades of success, we have cultivated deep technological expertise and adopted industry best practices, which we actively share with our partners
Responsibility and Integrity	→ Each company in the Group upholds strict standards of corporate governance, business ethics, and regulatory compliance

Why Bell Integrator

Flexible Engagement Models

Depending on the project's size and complexity, we provide either cohesive, cross-functional teams or individual IT professionals skilled in high-demand technology stacks.

End-to-End Development and Beyond

We can join your project at any stage or deliver a turnkey solution. Our services span analytics, software development, testing, audits, IT systems maintenance, software import substitution, and outstaffing. We also help enhance and optimize existing products.

Innovation and Adaptability

Our strength lies in original thinking, flexibility, and a commitment to solving challenges with unconventional, effective IT solutions. We take every client's needs into account and deliver what others often cannot.
